§ 1.56 DUTY TO DISCLOSE INFORMATION MATERIAL TO PATENTABILITY. (Added 3/16/92)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine: (Added 3/16/92)

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (Added 3/16/92)
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office. (Added 3/16/92)

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and (Added 3/16/92)

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or (Added 3/16/92)
- (2) It refutes, or is inconsistent with, a position the applicant takes in: (Added 3/16/92)
 - (i) Opposing an argument of unpatentability relied on by the Office, or (Added 3/16/92)
 - (ii) Asserting an argument of patentability. (Added 3/16/92)

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability. (Added 3/16/92)

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are: (Added 3/16/92)

- (1) Each inventor named in the application; (Added 3/16/92)
- (2) Each attorney or agent who prepares or prosecutes the application; and (Added 3/16/92)
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application. (Added 3/16/92)

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor. (Added 3/16/92)

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application. Subject: RE: Charlie Winterfeldt BOC Group Agreement

I spoke with Charlie yesterday, and he said that he is not interested in signing any paperwork.

In consideration of my employment by The BOC Group, Inc., a Delaware corporation, or a subsidiary or affiliate thereof (hereinafter collectively called the "Company"), during such time as shall be mutually agreeable to the Company and myself, I, for myself, my heirs, executors, administrators and assigns, do hereby agree as follows:

1. I shall not, directly or indirectly, other than in the business of the Company and in the scope of my employment by the Company, disclose or use at any time (either during or subsequent to my said employment) any information, knowledge or data of the Company which is of a secret or confidential nature, unless I shall secure the prior written consent of the Company. Without any limitation intended, the provisions of this paragraph shall extend to and include guides used in the Company's business, customer lists, drawings, letters, technical, financial and marketing information. I agree that, upon termination of my employment, I shall promptly deliver to the Company all customer lists, guides, letters, notes and other papers of a confidential nature and any copies thereof, which are in my possession or under my control.

2. (a) I shall promptly grant and assign to the Company for its sole use and benefit any and all inventions and improvements together with all letters patent and reissues thereof that may at any time be granted for or upon any such inventions or improvements which I may make or conceive during the period of my employment except such inventions or improvements which I may make or conceive outside of working hours, using no equipment, supplies, facilities or trade secret information of the Company and which neither (i) relate to the Company's business or research, nor (ii) result from any work performed by me for the Company.

(b) I agree, however, promptly to disclose to the Company, in confidence, any and all inventions or improvements made or conceived by me, whether solely or jointly with others, during the term of my employment, for the purpose of determining such issues of assignment as may arise concerning said inventions or improvements.

3. I shall, without charge but at the expense of the Company, promptly at all times hereafter, execute and deliver such applications, assignments, descriptions and other instruments as may be necessary or proper in the opinion of the Company to vest the title in the Company to any such inventions, improvements, and patents or reissues thereof, and to enable the Company to obtain and maintain the entire right and title thereto throughout the world.

4. I shall render to the Company at its expense (including a reasonable payment for the time involved in case I am not then in its employ) all assistance it may require (a) in the prosecution of applications for patents or reissues thereof; (b) in the prosecution or defense of interferences which may be declared involving any of said applications or patents; and (c) in litigation in which the Company may be involved relating to any such patents, inventions or improvements.

5. I understand that the provisions hereof do not constitute a contract of employment and nothing herein entitles me, in the absence of a written employment agreement executed by a duly authorized officer of the Company, to remain in the employ of the Company.

RE: U.S. Patent Application No. 10/601,687
Filed: June 23, 2003
Entitled: Method And Apparatus For Self-Configuring Supervisory Control And Data Acquisition (SCADA) System For Distributed Control
Case: M02A442

Dear Mr. Winterfeldt:

Enclosed please find a copy of the above-referenced patent application for the invention of which you are a co-inventor. Also enclosed for your execution is an inventor's Declaration to be signed (and dated) by you in blue ink; (b) an Assignment which you should please sign on the same date that you sign (and date) the Declaration, and (c) a Power of Attorney or Authorization of Agent which you should also please sign and date.

Please review the application carefully and make sure that you agree with it's contents prior to executing the Declaration.

If there are no changes to be made, read the Declaration carefully, paying particular attention to the fact that, by signing the Declaration, you acknowledge the following:

- a) To the best of your knowledge, you are the first and true inventor of the subject matter of the patent application.
- b) You owe the highest duty of candor and good faith in your dealings with the Patent and Trademark Office, and in discharge of this duty, you must disclose to the Patent and Trademark Office any information of which you are aware that is "material to examination of this application" as defined in the attached 37 CFR Section 1.56. Such information is material when, at least in part, there is a substantial likelihood that a patent examiner would consider it important in deciding whether the subject matter of the present application is patentable.

After these steps have been taken, please sign (and date) the Declaration.

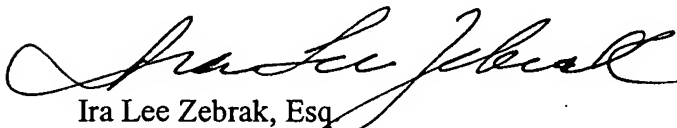

The Assignment should be signed by you and notarized at the same time that you sign and date the Declaration.

The Power of Attorney or Authorization of Agent should be signed and dated by you.

Please return the application copy with the signed Declaration, signed Assignment and signed Power of Attorney. The extra copy of the application is for your records.

On behalf of BOC Edwards, thank you once again for your submittal of the above-referenced invention record. Your interest in creating new ideas and willingness to formally document them are greatly appreciated. If you should have any questions, please feel free to telephone me.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Ira Lee Zebrak".

§ 1.56 DUTY TO DISCLOSE INFORMATION MATERIAL TO PATENTABILITY. (Added 3/16/92)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine: (Added 3/16/92)

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (Added 3/16/92)
 - (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office. (Added 3/16/92)
- (b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and (Added 3/16/92)

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or (Added 3/16/92)
- (2) It refutes, or is inconsistent with, a position the applicant takes in: (Added 3/16/92)
 - (i) Opposing an argument of unpatentability relied on by the Office, or (Added 3/16/92)
 - (ii) Asserting an argument of patentability. (Added 3/16/92)

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability. (Added 3/16/92)

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are: (Added 3/16/92)

- (1) Each inventor named in the application; (Added 3/16/92)
- (2) Each attorney or agent who prepares or prosecutes the application; and (Added 3/16/92)
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application. (Added 3/16/92)

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor. (Added 3/16/92)

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application. (Added 11/7/00)
